#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3617

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lagano et al. Lagano et al disclose the claimed structure including an air intake structure with an air cleaner case 26, an air duct pipe 35, a turbocharger 18 and the turbocharger is on opposite area of the engine 12. The intended use for a small watercraft has been given limited weight because intended use defines no patentable structure.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lagano et al in view of Korenjak et al. Lagano et al do not disclose a watercraft. Korenjak et al teach a watercraft with a turbocharger (note a waterjet inherently would have a drive shaft and propeller). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Lagano et al in a watercraft as taught by Korenjak et al for improved range of use.

Art Unit: 3617

5. Claims 2, 4-10, 12-14, and 16-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 23 and 24 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Torigai shows a turbo. Sugiura shows a turbo.
